ACCA WRIGHT PRODUCTS

About Us

ACCA Wright Products is an ISO-certified manufacturer specializing in the extrusion of UPVC window and door profiles. Operating out of India, we boast an impressive annual production capacity of 4,500 tons. Our UPVC profiles are crafted to meet stringent quality standards, catering to both domestic and global markets.

Our modern manufacturing unit is outfitted with cutting-edge technology, enabling us to deliver products with exceptional consistency and accuracy. At ACCA Wright Polymers, we are deeply committed to sustainable practices and continuous innovation, driving progress and setting new benchmarks in the UPVC industry.

Our Commitment to Quality

At ACCA Wright Products, we use high-grade raw materials and additives from internationally reputed brands like BAERLOCHER, DOW, and KANEKA in our profile production. This guarantees that our UPVC systems are built to last—resisting fading, warping, and cracking over time, while maintaining their strength and reliability.

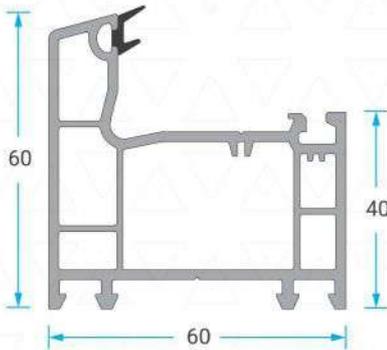

Our premium Titanium Dioxide (TiO₂) formulation offers excellent UV protection, improving the profiles' stability and resilience against extreme weather. This ensures long-lasting durability and consistent performance over time.

REINFORCEMENT DRAWINGS

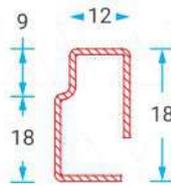

For added strength and long-term durability, we suggest using GI reinforcements with our UPVC profiles, ranging in thickness from 1.0 mm to 2.5 mm. This helps ensure the windows perform reliably and have a longer lifespan. Comprehensive technical drawings are available for reference.
